For this Camel XML Project, I tried to use this dependency which was earlier used in BooksAPI and DBConnector API with removing the Database Dependencies:

```xml
<dependency>
            <groupId>org.springframework.boot</groupId>
            <artifactId>spring-boot-starter-web</artifactId>
    </dependency>
    <dependency>
            <groupId>org.apache.camel.springboot</groupId>
            <artifactId>camel-spring-boot-starter</artifactId>
            <version>3.18.3</version>
    </dependency>
    <dependency>
            <groupId>org.apache.camel</groupId>
            <artifactId>camel-swagger-java</artifactId>
            <version>3.18.3</version>
            <scope>test</scope>
    </dependency>
    <dependency>
            <groupId>org.apache.camel.springboot</groupId>
            <artifactId>camel-servlet-starter</artifactId>
            <version>3.18.3</version>
    </dependency>
    <dependency>
            <groupId>org.apache.camel</groupId>
            <artifactId>camel-http</artifactId>
            <version>3.18.3</version>
            <scope>test</scope>
    </dependency>
    <dependency>
            <groupId>org.apache.camel</groupId>
            <artifactId>camel-jackson</artifactId>
            <version>3.18.3</version>
    </dependency>
    <dependency>
            <groupId>org.springframework.boot</groupId>
            <artifactId>spring-boot-devtools</artifactId>
            <scope>runtime</scope>
            <optional>true</optional>
    </dependency>
    <dependency>
            <groupId>org.springframework.boot</groupId>
            <artifactId>spring-boot-starter-test</artifactId>
            <scope>test</scope>
```

```xml
            </dependency>
            <dependency>
                    <groupId>org.springframework.boot</groupId>
                    <artifactId>spring-boot-starter-undertow</artifactId>
            </dependency>
            <dependency>
                    <groupId>com.fasterxml.jackson.dataformat</groupId>
                    <artifactId>jackson-dataformat-xml</artifactId>
                    <version>2.12.5</version><!--$NO-MVN-MAN-VER$--> <!-- Use the
appropriate version -->
            </dependency>
            <dependency>
                    <groupId>com.sun.xml.bind</groupId>
                    <artifactId>jaxb-impl</artifactId>
                    <version>2.3.3</version>
            </dependency>
            <dependency>
                    <groupId>org.apache.camel</groupId>
                    <artifactId>camel-jaxb</artifactId>
                    <version>3.18.3</version>
            </dependency>
            <dependency>
                    <groupId>org.apache.camel</groupId>
                    <artifactId>camel-core</artifactId>
                    <version>3.18.3</version>
            </dependency>
</dependencies>
```

This pom file has these dependencies:
1. org.springframework.boot:spring-boot-starter-web
2. org.apache.camel.springboot:camel-spring-boot-starter:3.18.3
3. org.apache.camel:camel-swagger-java:3.18.3 (with scope test)
4. org.apache.camel.springboot:camel-servlet-starter:3.18.3
5. org.apache.camel:camel-http:3.18.3 (with scope test)
6. org.apache.camel:camel-jackson:3.18.3
7. org.springframework.boot:spring-boot-devtools (with scope runtime and optional)
8. org.springframework.boot:spring-boot-starter-test (with scope test)
9. org.springframework.boot:spring-boot-starter-undertow
10. com.fasterxml.jackson.dataformat:jackson-dataformat-xml:2.12.5
11. com.sun.xml.bind:jaxb-impl:2.3.3
12. org.apache.camel:camel-jaxb:3.18.3
13. org.apache.camel:camel-core:3.18.3

This error came by using this dependency:

org.apache.camel.FailedToCreateRouteException: Failed to create route route1 at: >>> To[https://058a98e5-203e-4e80-a84e-df906be7f01b.mock.pstmn.io/get?bridgeEndpoint=true] <<< in route: Route(route1)[From[direct:invoke-get-book-by-id] -> [Marshal... because of No endpoint could be found for: https://058a98e5-203e-4e80-a84e-df906be7f01b.mock.pstmn.io/get?bridgeEndpoint=true, please check your classpath contains the needed Camel component jar.

By using this dependency, the routes are not working in camel, which means that there are dependency issues of using jacksonXml in this project.

After using this dependency Pom file, the issue solved:

```
<properties>
            <project.build.sourceEncoding>UTF-8</project.build.sourceEncoding>
            <project.reporting.outputEncoding>UTF-8</project.reporting.outputEncoding>
            <!-- configure the version of Fuse want to use here -->
            <!--<fuse.version>7.11.0.fuse-sb2-7_11_0-00028-redhat-00001</fuse.version>
-->
            <maven.compiler.source>11</maven.compiler.source>
            <maven.compiler.target>11</maven.compiler.target>
            <assembly.skipAssembly>true</assembly.skipAssembly>
            <camel.version>3.18.3</camel.version>
            <spring.boot.version>2.7.12</spring.boot.version>
            <java.version>11</java.version>
    </properties>
    <dependencies>
        <dependency>
